Option

Effort

Most effort, need to

buid report and run

Logistic

Legal

Report:

build report

Client API:

write client plug-in

Need to build query through client API

Need to build custom query

Least effort, only acquire the dump

Least logistic constraint, can do remotely with Jazz.net account.

Difficult because the client access is restricted

Must be on site during the query and development to get assitance

Most logistic constraint, need to convince very high level executives

Least legal constraint, reports are available to every one.

Most information through the API are avaiable.

Some information is needed to be censored.

Most legal constraint, hard to do without consulting lawyers.

EObject:

write custom query

Database Dump: get database dump
